HomeRemote™ Pro Wireless Video Camera with Night Vision

For use with the Homeremote Pro Gateway (required)
Pro-Level™ subscription required to view live video remotely

Add live streaming video to your HomeRemote Pro System. The HRPC2 HomeRemote Pro Wireless Video Camera with Night Vision is an advanced camera that allows you to view live video from the HomeRemote Pro web browser interface or from your cell phone using Cell-Link™*. Unlike standard Internet cameras that require complicated router configurations, the HRPC2 features true plug and play installation. Simply plug the camera into one of your router's local ports, log on to the HomeRemote Pro website and enter the product key of the camera. Adding live streaming video has never been easier. The HomeRemote Pro Video Camera with Night Vision includes a powerful 16 channel video recording software, advanced 2 window motion detection with FTP, E-mail, Network Storage and Flash Storage triggered recordings and Wi-Fi capabilities for wireless installations.

FEATURES

- High quality, live video at up to 30 frames per second
- True plug and play installation
- View live video from the HomeRemote Pro webpage or from your Internet enabled cell phone (Pro-Level subscription required)
- Infrared LED Night Vision Technology
- Record video based on set schedules or motion triggers to a FTP server, USB drive, E-mail or Network Storage unit

Web User Interface

Cell Phone Interface
